

THE MOST ADVANCED PLATFORM IN THE AUTOMOTIVE MARKET

Carnomaly is a solution at the intersection of blockchain technology and the automotive industry. The Carnomaly trading platform will transform how we buy and sell cars, powered by the transparency, speed, and limitless potential of its blockchain database.

How It Works

- Carnomaly has created CARRchain, the Comprehensive Automotive Records Repository. Historical data on every car, identified by its unique VIN, will live unaltered in this global blockchain database.
- CARRchain will serve as the foundation for the Carnomaly platform, which allows individuals and dealers to buy and sell cars with the integrity of accurate, comprehensive vehicle reports, improved search functionality, greater privacy control, and a streamlined purchasing process.
- Slow title transfers, inaccurate or incomplete car history reports, and other common pain points of car trading will be eliminated through the comprehensive CARRchain database.

We're transforming the automotive industry. Here's how you can join us.

The Carnomaly platform is in development now, but you can experience the CARRchain demo site today. Be one of the first to see how easy it is to use CARRchain by creating a free test account.

CARRtokens, available for pre-sale now, are how you buy in to Carnomaly's vision.

The more tokens you buy, the greater your CARRtoken rewards when you buy a new car and register it to your CARRchain account.

THIS IS JUST THE BEGINNING. THERE'S MORE TO LEARN.

To discover the details behind Carnomaly, our CARRtoken rewards program, or to test the CARRchain database visit Carnoamly.io/learnmore.
